github.com/satyam0238 | satyamkumar.dev | Bengaluru, India

Java Backend Developer interning at BigBasket (Tata Group), designing REST APIs, modeling MySQL schemas, and shipping backend services in Java and Vert.x. Own features end-to-end — from schema design and API implementation to validation, error handling, and production deployment. Strong foundation in OOP, system design, and data structures; actively preparing for SDE roles at product-based companies.

TECHNICAL SKILLS

Languages: Java · JavaScript · C++ · SQL **Backend:** Vert.x · Node.js · Express.js · REST API Design
Databases: MySQL · MongoDB · Schema Design · Query Optimization **Frontend:** React.js · HTML5 · CSS3
Tools: Git · Postman · Linux · CI/CD **Concepts:** OOP · DBMS · OS · Computer Networks · System Design · DSA

KEY ACHIEVEMENTS

- Built Catalog-Admin solo at BigBasket — designed the schema, wrote all backend APIs in Vert.x, and delivered the React.js dashboard; the tool is live and used daily by the catalog operations team.
- Wrote and deployed production APIs at BigBasket — reviewed by senior engineers and serving real users on one of India's largest grocery platforms backed by Tata Group.
- Consistent LeetCode practice with focus on arrays, stacks, queues, and linked lists — targeted preparation for product-based SDE interviews.

EXPERIENCE

Backend Engineering Intern · **BigBasket · Tata Group, Bengaluru** *Jan 2026 – Present*

- Develop and maintain backend services in Java and Vert.x for BigBasket's internal platform — covering catalog management and operations workflows used by the business in production.
- Designed and shipped Catalog-Admin (Vert.x, MySQL, React.js) — replaced a manual, spreadsheet-based workflow with a purpose-built internal tool; the catalog team now manages product data entirely through it.
- Implemented CRUD APIs with request validation and structured error responses; improved MySQL query performance by reworking indexes and normalizing the schema for frequently read tables.
- Work in an Agile team — involved in sprint planning, technical design discussions, and peer code reviews; have taken code to production multiple times.

Frontend Developer Intern · **Bluestock Fintech · Remote** *Jan – Mar 2025*

- Built the Blog Detail Page in React.js; applied lazy loading and component-level optimizations that noticeably cut page load time — validated using browser dev tools.
- Converted Figma mockups into responsive React components across multiple pages; worked closely with the design team to keep the UI consistent throughout the product.

Full-Stack Trainee · **Solitaire Infosys · Chandigarh** *May – Aug 2024*

- Built web application prototypes using Node.js, Express.js, and JavaScript, covering backend routing, REST API basics, and responsive UI — first hands-on exposure to full-stack development.

PROJECTS

Catalog-Admin (Production) · *Java · Vert.x · MySQL · React.js* *Feb – Mar 2026*

- Designed the MySQL schema with normalized tables, foreign key constraints, and indexes for efficient reads; built a REST API layer in Vert.x handling all CRUD operations with input validation and error handling.
- Built the React.js admin dashboard on top of the APIs — gave the catalog team full control over product data without needing engineering support.

Service Provider App (Live) · *React.js · Node.js · Express.js · MongoDB · JWT* *Aug – Oct 2024*

- MERN-stack app for booking local service professionals — implemented JWT authentication, service listing APIs, and MongoDB collections for user and booking data.

Food Ordering App (Live) · *React.js · Node.js · Express.js · MongoDB · JWT* *Dec 2024 – Feb 2025*

- Full-stack food ordering app covering menu browsing, cart, and checkout — JWT-secured sessions, RESTful API routes, and MongoDB schemas for menus, users, and order history.

EDUCATION

B.Tech – Computer Science & Engineering · CGC Landran, Punjab (CGPA: 8.2 / 10) *2022 – Present*
Class 12 – CBSE · DAV Public School Samana (89.6%) *2021-2122*
Class 10 **– CBSE** · DAV Public School Samana (85.4%) *2019 – 2020*

CERTIFICATIONS

React.js · Coursera · Certificate . Components, Hooks, State Management, React Ecosystem *Mar 2025*
Database Management Systems · NPTEL · Certificate . RDBMS, SQL, ER Model, Normalization, Transactions *Sep 2024*
